Service description

Pentanet Fixed Wireless uses cutting-edge wireless technology to deliver fast internet to your home. Our install team will position a small receiver dish on your roof that connects to our network via one of many transmission towers around Perth. We will also install a data point within your home for your router to connect to. Pentanet Fixed Wireless is an internet-only service.

Alternatively, you are welcome to bring your own, providing it was purchased from a retailer. Routers supplied by other internet service providers are not compatible with our network.

Please note that if you do choose to bring your own equipment, we cannot provide technical support for it.

Performance in your premises

Pentanet is responsible for delivering the internet service to your premises. The exact point where the internet service enters your premises is often referred to as the 'demarcation point'. For Fixed Wireless, this point is the port on your PoE power injector (labelled 'LAN') inside your home.

Delivering the service around your home is the role of your internal networking equipment. Whilst the Pentanet support team may offer suggestions for devices that improve your internal network experience, it is recommended that you speak with an IT professional if you are experiencing speed issues after the point of demarcation. These issues could be related to any one or all of the below:

- Poor Wi-Fi coverage
- Unsuitable modem/router
- Inadequate internal cabling
- Faulty network equipment or devices
