Performance in your premises

Pentanet is responsible for delivering the internet service to your premises. The exact point where the internet service enters your premises is often referred to as the 'demarcation point'. For neXus, this is the data point your Prism Edge connects to. You may purchase an additional Prism Edge to extend coverage around your premises. Alternatively, you may supply your own Wi-Fi device, however please note that our team will not be able to provide technical support for it.

For more information regarding routers, visit our [Knowledge Base](#).

Delivering the service and Wi-Fi around your home or business is the role of your internal networking equipment. Whilst the Pentanet support team may offer suggestions for devices that improve your internal network experience, it is recommended that you speak with an IT professional if you are experiencing speed issues after the point of demarcation. These issues could be related to any one or all of the below:

-  Poor Wi-Fi coverage
-  Unsuitable user-supplied router or equipment
-  Inadequate internal cabling
-  Faulty network equipment or devices
