### Early termination charges

If you enter into a fixed-term contract and during your term, choose to move to a new address that does not have fixed wireless coverage, early termination fees will apply.

Regardless of your contract term, the hardware on your rooftop remains the property of Pentanet and must be collected within two weeks of service cancellation. If we are not granted and facilitated access to the property during this time, an additional fee of \$100 will be charged.

Contract Term	Months remaining in term	Charge
Month-to-month	N/A	\$0
12-month	7-12	\$450

Cancellations are subject to a 30-day notice period. If you wish to cancel the service prior to the 30th day we can accommodate this, however it is important to note that you will be billed for the full 30 days.

### Service relocation

If you choose to move to a new address and wish to relocate your service, a \$200 relocation fee will apply. This fee covers a standard installation only. Additional installation charges may apply, see the Installation Charges section for more information.

If you entered into a fixed-term contract and are moving to a non-serviceable location, or for any reason decide not to proceed with the relocation, early termination fees will apply.

## Data & Speed

### Data usage

Your total data usage is the combination of both downloads and uploads.

Knowing how much data online activities can use may also help you with managing your expenditure. The below guide may be of assistance. Please note that these are approximate values, so your actual usage could be far greater.

Activity	Data used
Emails	500KB per email
Photos/Documents	850KB per image
Streaming Video	300MB – 7GB per hour
Streaming Audio	25-150MB per hour
Internet browsing	10-50MB per hour
Online gaming	100MB-1GB per hour

### Shaping

If you exceed your monthly data allowance, you won't be billed for any excess usage. However, speeds will be shaped to 1Mbps/1Mbps until the next billing cycle. This shaping applies to both the on-peak and off-peak time frames.

### Monitor usage

You can view your monthly and daily usage, as well as current usage breakdown in our [Customer Portal](#).

### Performance in the home

Pentanet is responsible for delivering the internet service to your premises. The exact point where the internet service enters your premises is often referred to as the 'demarcation point'. For Fixed Wireless, this point is the port on your PoE power injector (labelled 'LAN') inside your home.

Delivering the service around your home/business is the role of your internal networking equipment. Whilst the Pentanet support team may offer suggestions for devices that improve your internal network experience, it is recommended that you speak with an IT professional if you are experiencing speed issues after the point of demarcation. These issues could be related to any one or all of the below:

- Poor WiFi coverage
- Unsuitable Modem/Router
- Inadequate internal cabling
- Faulty network equipment or devices
