Performance in the home

Pentanet is responsible for delivering the internet service to your premises. The exact point where the internet service enters your premises is often referred to as the 'demarcation point'. For LBN, this point is the Network Termination Device (NTD) installed by LBNco.

Delivering the service around your home is the role of your internal networking equipment. Whilst the Pentanet support team may offer suggestions for devices that improve your internal network experience, it is recommended that you speak with an IT professional if you are experiencing speed issues after the point of demarcation. These issues could be related to any one or all of the below:

- Poor WiFi coverage
- Unsuitable Modem/Router
- Inadequate internal cabling
- Faulty network equipment or devices
