Service description

PentaMAX is a blazingly fast short range fixed wireless service offered by Pentanet. Using millimeter wave (mmWave) technology, PentaMAX delivers a 60GHz symmetrical connection with lower latency and consistent, reliable speeds for home or business. To receive the PentaMAX service, our install team will position a small receiver dish on your roof that talks to our network via one of many transmission towers scattered around Perth. We will also install a data point within your premises for your router to connect to.

Availability

PentaMAX is only available if your premises have line of sight to our transmitters. You can check availability on our [website](#).

Requirements

To facilitate connectivity, you will require a router. If you would like to purchase one from us, prices start from \$145. Our team will also program it for you, ready for you to plug and play.

Alternatively, you are welcome to bring your own, providing it was purchased from a retailer. Routers supplied by other internet service providers are not compatible with our network.

Please note that if you do choose to bring your own equipment, we cannot provide technical support for it.

For more information regarding router requirements, visit our [Knowledge Base](#).

Performance

Pentanet is responsible for delivering the internet service to your premises. The exact point where the internet service enters your premises is often referred to as the 'demarcation point'. For PentaMAX, this point is the port on your PoE power injector (labelled 'LAN') inside your premises.

Delivering the service around your business is the role of your internal networking equipment. Whilst the Pentanet support team may offer suggestions for devices that improve your internal network experience, it is recommended that you speak with an IT professional if you are experiencing speed issues after the point of demarcation. These issues could be related to any one or all of the below:

- Poor WiFi coverage
- Unsuitable Modem/Router
- Inadequate internal cabling
- Faulty network equipment or devices
