

Due to unforeseen circumstances that only become apparent during installation of this service, Pentanet does not offer firm quotes prior to installation.

For transparency, we have listed all possible additions that may be required for an installation, which will increase the cost from the base of \$200.

Our installers will always endeavor to inform you of the required additions prior to installation and will show you them once the installation is complete.

Item/Parameters	Cost
Standard installation/relocation	\$200
Commercial installation	\$300
Extension pole	\$100
Brace bar	\$50
Additional cabling (bottom floor or large premises)	\$100
Additional parameters (conduit, raked ceiling, architectural issues)	\$110/hour
Elevated Work Platform hire (4hours)	\$350
620mm antenna rental fee* (once-off)	\$200
620mm noise filtering antenna rental fee* (once-off)	\$450
Maintenance - Customer at fault site visit charge	\$110/hour

* All antennas remain the property of Pentanet Pty Ltd. These larger and more advanced antennas may be required when there is significant distance from towers/arrays or excessive RF noise.

Please note: Most commercial installations require a pole mount to establish line of sight over roof parapets and facades. Residential installs may require a pole for line of sight over neighbouring houses, buildings or trees.
